DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-57, 83 and 87-90, drawn to calculating time information from a first and second control channel, classified in class 370, subclass 347.
 - II. Claim 58-82 and 84-86, drawn to determining the GPS position/location of a mobile unit, classified in class 342, subclass 357.06.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions perform different functions, wherein Group I computes proper timing from an unavailable control channel and Group II detects the location of a mobile unit.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and therefore the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the

Art Unit: 2662

currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
